

CLAIM AMENDMENTS

1. (Currently amended) Outside rear-view mirror for a motor ~~vehiele~~, particularly a ~~passenger car of the sports car type, in the case of which~~ vehicle comprising a housing accommodating a mirror glass plate is and connected with a carrying device having two supporting arms which have a V-shaped course from a base section of the carrying device to the housing, which carrying device is supported on a body of the ~~passenger car~~ motor vehicle,

wherein ~~the carrying device and the housing are produced separately from one another~~, free ends of the supporting arms of the carrying device ~~projecting~~ project into the housing, wherein each supporting arm penetrates an opening in the housing by means of a collar and the housing rests in the area of the opening on a shoulder bounding the collar, and being wherein the free ends of the supporting arms are connected with carrying elements of the housing.

2. (Canceled)

3. (Withdrawn) Outside rear-view mirror according to Claim 1, wherein the housing is made of a plastic material.

4. (Withdrawn) Outside rear-view mirror according to Claim 1, wherein the carrying device consists of ~~metal, for example, of a light metal diecasting~~ metal.

5. (Canceled)

6. (Withdrawn) Outside rear-view mirror according to ~~Claim 5~~ Claim 1, wherein the supporting arms have an aerodynamic shape.

7. (Withdrawn) Outside rear-view mirror according to Claim 1, wherein the carrying elements and the housing are produced from one piece.

8. (Withdrawn) Outside rear-view mirror according to Claim 3, wherein the carrying elements and the housing are produced from one piece.

9. (Withdrawn) Outside rear-view mirror according to ~~Claim 8~~ Claim 4, wherein the carrying elements and the housing are produced from one piece.

10. (Withdrawn) Outside rear-view mirror according to ~~Claim 9~~ Claim 6, wherein the carrying elements and the housing are produced from one piece.

11. (Currently amended) Outside rear-view mirror assembly for a passenger car comprising:

a mirror housing,

a mirror glass plate supported in the mirror housing,

a carrying device including two supporting arms, which have a U-shaped

configuration from a base section of the carrying device to the housing,
attachable with the housing, said carrying device being attachable in use to a
body part of the passenger car,

wherein the mirror housing and carrying device are formed of different
materials,

wherein each supporting arm penetrates an opening in the mirror housing
by means of a collar,

wherein the mirror housing rests in the area of the opening on a shoulder
bounding the collar, and

wherein free ends of the supporting arms project into the mirror housing
and are connected with carrying elements of the mirror housing.

12. (Canceled)

13. (Currently amended) Mirror assembly according to ~~Claim 12~~ Claim
11, wherein the housing is made of a plastic material.

14. (Currently amended) Mirror assembly according to ~~Claim 12~~ Claim
11, wherein the carrying device consists of ~~metal, for example, of a light metal~~
~~diecasting~~ metal.

15. (Currently amended) Mirror assembly according to Claim 13, wherein the carrying device consists of ~~metal, for example, of a light-metal diecasting~~ metal.

16-17. (Canceled)

18. (New) Outside rear-view mirror according to Claim 1, wherein the motor vehicle is a passenger car of the sports car type.

19. (New) Outside rear-view mirror according to Claim 1, wherein the carrying device and the housing are produced separately from one another.

20. (New) Outside rear-view mirror according to Claim 4, wherein the metal is a light-metal diecasting.

21. (New) Mirror assembly according to Claim 14, wherein the metal is a light-metal diecasting.

22. (New) Mirror assembly according to Claim 15, wherein the metal is a light-metal diecasting.
